

# Dot to Dot & Color

- 1 - 33
- 1 - 28
- 1 - 33

A large dot-to-dot puzzle of a toucan bird. The puzzle consists of numerous numbered dots (1-33) scattered across the page. Some parts of the bird are already drawn with solid black lines, including the beak, the eye, the neck, and the tail. The remaining parts, such as the body, wings, and feet, are represented by the numbered dots. The dots are color-coded according to the legend: teal for dots 1-33, orange for dots 1-28, and purple for dots 1-33. The puzzle is designed for children to connect the dots and then color the bird.
